SEC. 1548. REDUCTION OF THREATS POSED BY NUCLEAR WEAPONS TO THE UNITED STATES

- (a) FINDINGS.—Congress makes the following findings:
- (1) The use of nuclear weapons poses an existential threat to humanity, a fact that led President Ronald Reagan and Soviet Premier Mikhail Gorbachev to declare in a joint statement in 1987 that a "nuclear war cannot be won and must never be fought".
- (2) On June 12, 1982, an estimated 1,000,000 people attended the largest peace rally in United States history, in support of a movement to freeze and reverse the nuclear arms race, a movement that helped to create the political will necessary for the negotiation of several bilateral arms control treaties between the United States and former Soviet

- Union, and then the Russian Federation. Those treaties contributed to strategic stability through mutual and verifiable reciprocal nuclear weapons reductions.
- (3) Since the advent of nuclear weapons in 1945, millions of people around the world have stood up to demand meaningful, immediate international action to halt, reduce, and eliminate the threats posed by nuclear weapons, nuclear weapons testing, and nuclear war, to humankind and the planet.
- (4) In 1970, the Treaty on the Non-Proliferation of Nuclear Weapons done at Washington, London, and Moscow July 1, 1968 (21 UST 483) (commonly referred to as the "Nuclear Non-Proliferation Treaty" or the "NPT") entered into force, which includes a binding obligation on the 5 nuclear-weapon states (commonly referred to as the "P5"), among other things, "to pursue negotiations in good faith on effective measures relating to the cessation of the nuclear arms race... and to nuclear disarmament".
- (5) Bipartisan United States global leadership has curbed the growth in the number of countries possessing nuclear weapons and has slowed overall vertical proliferation among countries already possessing nuclear weapons, as is highlighted by a more than 85-percent reduction in the United States nuclear weapons stockpile from its Cold War height of 31,255 in 1967.
- (6) The United States testing of nuclear weapons is no longer necessary as a result of the following major technical developments since the Senate's consideration of the Comprehensive Nuclear-Test-Ban Treaty (commonly referred to as the "CTBT") in 1999:
- (A) The verification architecture of the Comprehensive Nuclear Test-Ban-Treaty Organization (commonly referred to as the "CTBTO")—
- (i) has made significant advancements, as seen through its network of 300 International Monitoring Stations and its International Data Centre, which together provide for the near instantaneous detection of nuclear explosives tests, including all 6 such tests conducted by North Korea between 2006 and 2017; and
- (ii) is operational 24 hours a day, 7 days a week.
- (B) Since the United States signed the CTBT, confidence has grown in the science-based Stockpile Stewardship and Management Plan of the Department of Energy, which forms the basis of annual certifications to the President regarding the continual safety, security, and effectiveness of the United States nuclear deterrent in the absence of nuclear testing, leading former Secretary of Energy Ernest Moniz to remark in 2015 that "lab directors today now state that they certainly understand much more about how nuclear weapons work than during the period of nuclear testing".
- (7) Despite the progress made to reduce the number and role of, and risks posed by, nuclear weapons, and to halt the Cold War-era nuclear arms race, tensions between countries that possess nuclear weapons are on the rise, key nuclear risk reduction treaties are under threat, significant stockpiles of weapons-usable fissile material remain, and a qualitative global nuclear arms race is now underway with each of the countries that possess nuclear weapons spending tens of billions of dollars each year to maintain and improve their arsenals.
- (8) The Russian Federation is pursuing the development of destabilizing types of nuclear weapons that are not presently covered under any existing arms control treaty or agreement and the People's Republic of China, India, Pakistan, and North Korea have each taken concerning steps to diversify their more modest sized, but nonetheless very deadly, nuclear arsenals.
